RANCHERHISTORIAS. El Cómic

El comic, una serie de mini historias y sucesos tomado de la época de cuando para divertirse bastaba un pedazo de papel y algo con qué escribir, un lápiz, una pluma o lo que fuere. En esa época en la que al no tener elementos electrónicos a la mano, la diversión surgía de la inventiva, esa magia que todo ser humano tiene y que poco a poco la tecnología está aniquilando.

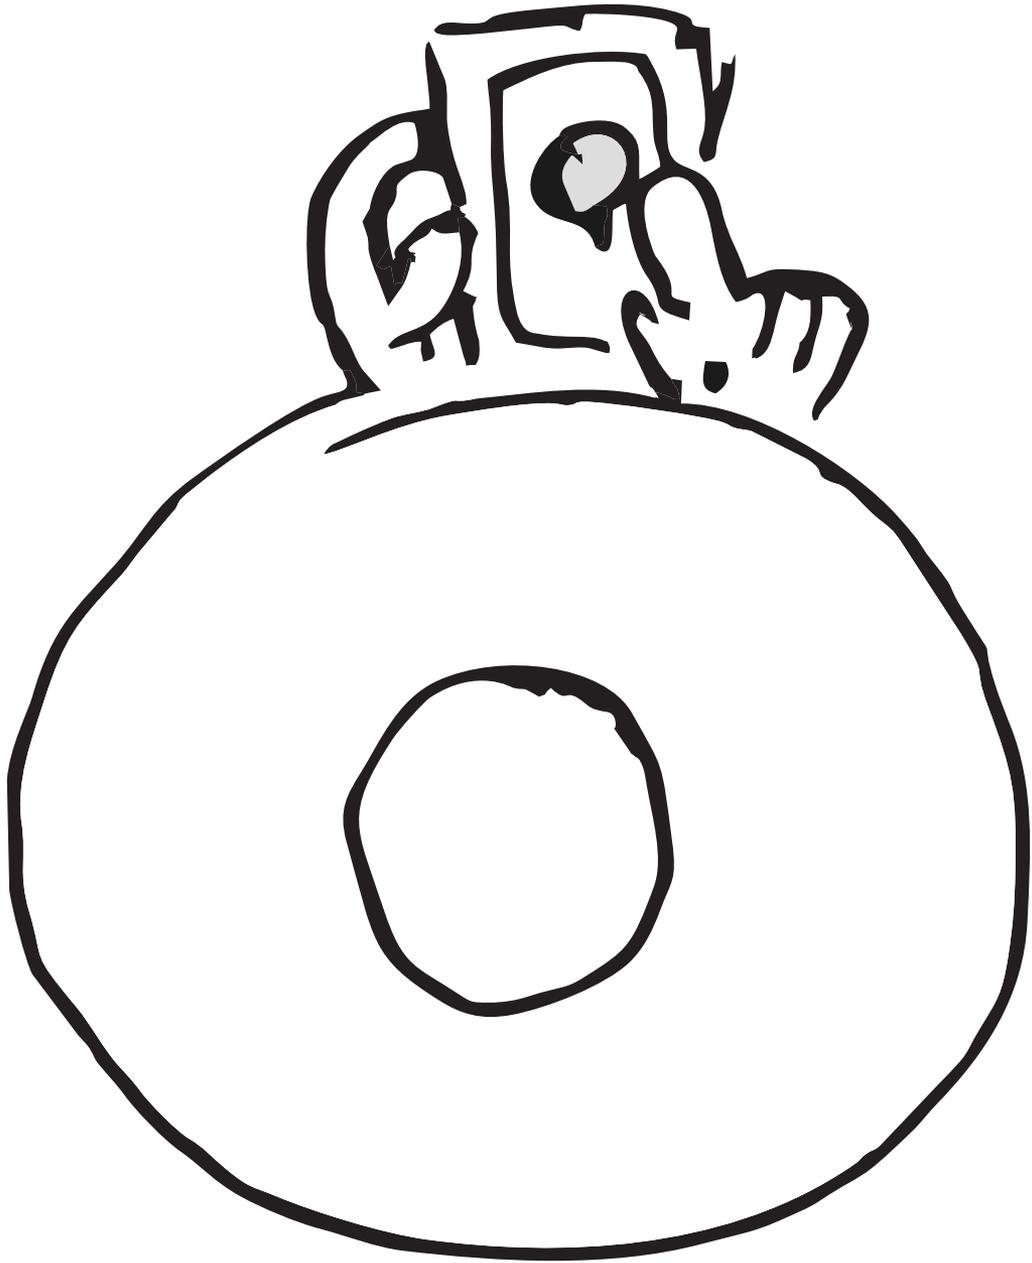

La imaginación según una definición que se antoja muy puntual dice: “La imaginación (del latín imaginatio, -oñis) es un proceso creativo superior que permite al individuo manipular información generada intrínsecamente con el fin de crear una representación percibida por los sentidos”. Éste era el elemento suficiente para la diversión en otro tiempo, no por eso concepto retrógrada o no contemporáneo, el hecho es que bastaba solo imaginar para que las horas pasaran desapercibidas, eso abonaba al dicho de “Hecha a volar la imaginación” el resultado era fabuloso, juegos como las escondidas, chinche al agua, el chicote, bebe leche, y otros tantos más que no requerían de ningún elemento; mucho menos de gasto alguno, así podríamos llegar a los juegos de, con 4 ó 5 rayones expresabas una idea que la contraparte en el juego debería de adivinar y decir de qué se trataba, muchas veces solo una acción, un elemento, un concepto o un suceso, hasta llegar a una minihistoria.

Lo que presentamos en estas Rancherhistorias, se basa en el juego clásico de dibujos, algunos hasta mal logrados lo ponían a uno a adivinar de qué se trataba, después de un momento decían “es un Rancherito haciendo tal o cual cosa”, así es como nacen las Rancherhistorias, el Cómic, que no es más que una remembranza de la forma en que antes se divertía la gente, así pues que los autores de este “Comic” la familia Carmona Alcalá, los invitamos a introducirse al concepto lúdico de “adivina qué es esto” deseando pasen momentos divertidos como nosotros al momento de hacer estos trazos, solo con intención de despertar la imaginación y sobre todo la diversión sana sin el distractor de la tecnología, esperemos que lo disfruten y.... comenzamos.

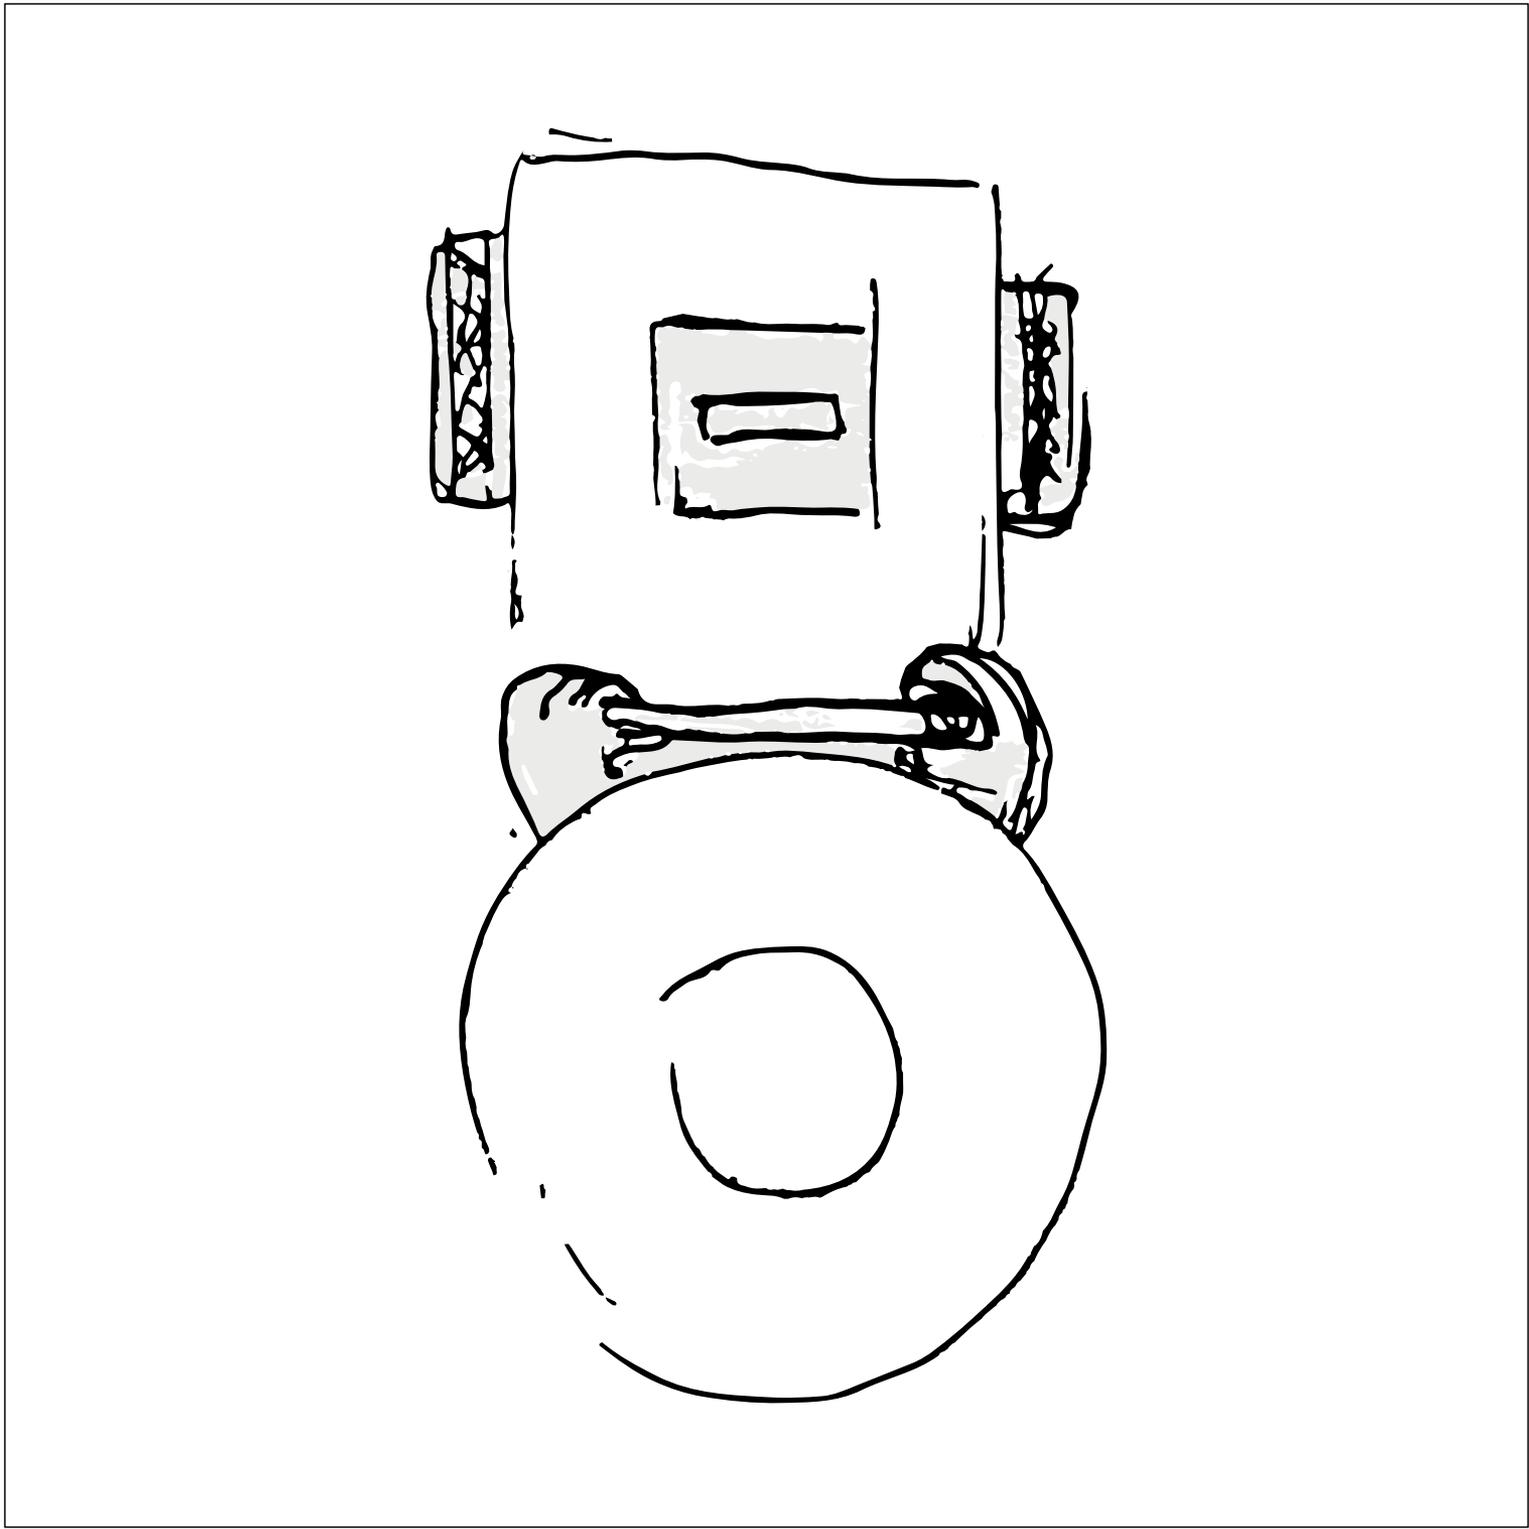

Nota importante, los trazos son realizados, de manera espontánea, incómoda sin soporte o mesa donde apoyarse, botaneando y entre risas, la calidad del dibujo es lo de menos.
